Utility Customer Service & Billing Made Simple

Unlimited billing power – electric/power, gas, cable, internet, water, sewer, special services, and more

We give you the missing pieces of the puzzle that makes Oracle's® JD Edwards EnterpriseOne **Utility Billing Solution Ready (UBSReady™)** without having to change your current EnterpriseOne (E1) infrastructure or integrate outside software solutions.

Using E1's framework as the basic building block, you can be assured that the system can handle all your Customer Care & billing needs. Using the other standard E1 Modules, you can be confident the system is stable and your investment in E1 is secure.

E1 Modules Unleashed

- Customer Address Book
- Fixed Assets
- Accounts Receivable
- Accounts Payable
- Real Estate Management
- Work Order Management
- Customer Master

QI Systems Technologies

- Flexible Calculation Module (QI FCM)™
- Rate Formula Manger (QI RFM)™

- Formula Extractor Tester (QI FET)™
- QI Driver Program (QI DP)™

If you are an E1 user, power user, developer, or IT infrastructure specialist, you can easily understand, implement and use QI UBSReady™. Multi-language is available by using E1 features and set up.

Because QI Systems built QI UBSReady with the E1 Toolset, you'll be positioned to take full advantage of Oracle Fusion Middleware in the future.

User Adoption

QI UBSReady™ looks and feels just like E1. That's why user adoption rates are high. Power Users can easily train and manage other users by using our extensive Wizards and pop up training videos.

Customer Service Representatives (CSR) work from a single screen laid out in a simple, easy to follow Grid Format. The QI Configurable **Customer Control Center (QI CCC)™** gives each CSR all they need to quickly and accurately handle all customer inquiries.

Pre-Built Integrations

Simply click "Map It" from the QI CCC™ and go to the

customer's address or jump over to Google Earth for a bird's eye view, plus much more.

- Google™ Earth
- Google Maps
- Google PowerMeter™
- Other free utility-based software and shareware

KPI Reporting

QI UBSReady™ provides access to any and all vital information within E1 using both Oracle's BI Publisher™ and QI KPA™. Being able to present this information to the right people at the right time in the right format is the foundation to the knowledge base of your utility.

Rate Management

QI FCM™ puts Rate Management responsibility into the hands of your power users. Power users can now make rate changes "on-the-fly" in minutes, including adding new service type codes to help generate more revenue for your utility.

Smart Metering

QI UBSReady™ is SMART Grid and Metering Ready – called QI IQ SGM™. As long as you can access the Grid and have SMART meters in place, we can take advantage of these new technologies and help you and

your customers increase their meter IQ.

QI IQGM™ provides flexible meter reading and read management with integration to various reading devices with the capability of mass meter read entry if needed.

Billing & e-Functions

- Wholesale Billing
- Unlimited Service Codes
- Consolidated Bills
- Revenue Assurance
- Complex Billing
- Real-Time Quotation
- E1 Electronic Commerce
- QI eBill™ with Oracle BI Publisher™
- QI CIQ™ Customer Self Service Intelligence
- QI eDoc™ eDelivery of letters, sales, marketing, notices, alerts, and more

Pricing

We'll work to meet your budget needs. Leasing and monthly payment plans available as well as fix bid flat rate pricing.

Implementation

We offer a 90 day implementation guarantee to all qualified E1 customers. It's as easy as doing a "Project" in the OMW.
